After sitting through several sales pitches for purchasing/leasing/installing solar from other outfits I was reluctant to hear yet another. But Matt was great and spoke my language. Our system is installed and we are very happy with the results.

I have known Matt both personally and professionally for many years now and he is a truly great guy. He always puts others first and is very considerate. He is an expert in the solar industry and world class at what he does. I would suggest his services to every homeowner in the state!

Harness Solar approached me in a professional manner about installing a solar energy system for my home. There was no pressure to do the project. I was just provided information by Matt on how the opportunity could help improve how electrical energy is provided for my home. I sincerely recommend Matt and Harness Solar to anyone interested in solar energy systems.

Matt goes above and beyond to make sure his customers are happy and understand solar. I've had solar experiences in the past and he totally blew my expectations out of the water. From day 1 to install complete and system turn on... Matt took care of everything with true professionalism.

I'd give Matt and his team 6 stars if I could. We signed with Matt and the solar was installed 2 weeks later, then turned on 2 weeks after that. The process was a breeze and his customer service is exceptional. Thanks Matt!

I have had the pleasure of knowing Matt for many years. He is intelligent, professional, conscientious and one of the kindest, most helpful people I know. He is extremely knowledgeable and will assist you through the entire solar process right through the installation. I have already done extensive research in Sunrun. You will be very happy with Matt and the top-notch Sunrun product.

We had a terrific experience with Matt! His honesty and expertise made the decision to go solar really easy to make. I used to think solar was just a gimmick until Matt knocked on my door. Now I'm an advocate of solar and can't believe I didn't make the switch years ago. Talk to Matt right away if you want to go solar! You will not regret it, I promise!

My parents got solar through Matt and recommended him to me. I am so glad they did and I could not have made a better decision. Matt made himself available at all times and answered all my questions thoroughly. Thank you for the good experience.

Matt made the process seamless from start to finish from inspection scheduling to roof repair service to installation. He's always available to answer questions
Just sit back and wait.. that's exactly what we did :-)

Matt is the best from start to finish. He answers all questions honestly. If he doesn't know, he finds out for you. He explains every step of the process upfront and he's with you all the way through. That's exactly what happened when we decided to go Solar with Matt. Very smooth process, professional installation in half a day, and we are now saving \$ with our working Solar system. Thanks again Matt!

We had a terrific experience with Matt. What began with a sales pitch ended in a greater appreciation and understanding of energy consumption and the human condition.

Matt was amazing! I must say I was skeptical of solar salesmen and I had a ton of questions. Matt was able to answer EVERY question I had with great confidence. He was professional, honest, and exceptionally knowledgeable. He followed through on EVERYTHING he said he would do. We signed up for solar on a Tuesday and by the following Friday it had been installed. Matt was there through the process and was truly a delight.
